

Redpoint Medical Standard Two-Day Immigration Exam Instructions

1. An initial visit is scheduled to review the examinee's medical history and vaccination status. Vaccination requirements will be determined at the first visit and vaccinations can be provided in our facility at an extra charge. If the examinee wishes to have vaccinations done elsewhere, documentation must be provided at the second day visit. Required blood work (age 15 and older) and PPD (age 2 and older) will be done. Blood testing for tuberculosis can be performed at an extra charge.
2. The second day visit is scheduled 48-72 hrs after the initial visit to allow the PPD to be read (if positive, a chest x-ray will be required at an extra charge). Blood work results will be reviewed. A physical exam will be done as required by the USCIS.
3. If all requirements have been met, the examinee will receive completed documentation (I-693) at the conclusion of the evaluation: original documents will be sealed in an envelope as required for forwarding to the USCIS, copies of the I-693 packet will be provided to the examinee, and Redpoint Medical will retain copies of all documents for future reference.
4. Charges to be paid in full at the second day visit.
 - a. A \$210.00 charge for the consultation, exam, paperwork, standard blood work and TB skin testing is due at the time of the second visit.
 - b. Chest X-ray, if required, is an extra \$59.00.
 - c. TB blood testing, if indicated or desired, is an extra \$65.00.
 - d. Vaccinations, if required, are provided at an extra charge. Redpoint Medical cannot accept insurance payment for vaccinations, but makes every effort to keep our charges as low as possible and competitive with other providers.
5. In certain circumstances, we can arrange for a Custom One-Day Visit.
 - a. Patients should be fluent enough in English to consult by phone.
 - b. The \$210.00 fee will be payable in advance of the visit (VISA and MasterCard accepted by phone).
 - c. Vaccination, blood test, TB test, and documentation requirements will be reviewed and recommendations provided in advance by phone, e-mail, or US Mail.
 - d. Patients should bring all required information, as instructed, to the exam.
 - e. Vaccines will be administered if not received in advance (at an extra charge).
